

INFINITY COLLECTION

Unrivaled Innovation

The Infinity Collection breaks multiple barriers, starting with the one blocking your view. The spa's rejuvenating water glides over our exclusive infinity (or vanishing) edge, taking your cares and worries with them while we leave nothing to prevent your seeing your world with a fresh perspective.

More bathers never means less water in an Infinity Collection model. The infinity edge design incorporates a "zero water displacement" feature with an ample reserve tank and integrated measuring gauge so your water surface always remains at the same level.
