

CURVE COLLECTION

A Higher Level of Spa Experience

We take hot tub design to a higher level in the Curve Collection featuring a raised rear wall with a gentle slope that belies its many strengths. Lay back in one of its gracefully elevated corners, wrapped in warmth, as you enjoy long, luxurious soaks sheltered from the wind and the eyes of the outside world.

To further heighten your experience, we add a flush-mounted 24-inch-wide waterfall, the largest available in any residential hot tub. The flow can easily be adjusted from a gentle flow that creates a relaxing ambiance, to a soothing stream to release neck and shoulder tension, to a powerful cascade of water so large - your kids can play underneath it. Vibrant, multicolored LED lights add a colorful dazzle to this already visual feast of an exclusive feature.
